

Hadamard-Pratt Multiplication Table

The entry in row a and column b is $a \star_P b$, defined by coordinatewise multiplication of the Pratt vectors: $M(a \star_P b) = M(a) \odot M(b)$.

$a \star_P b$	1	2	3	4	5	6	7	8	9	10	11	12
1	1	1	1	1	1	1	1	1	1	1	1	1
2	1	2	2	4	4	4	4	8	4	8	8	8
3	1	2	3	4	4	6	6	8	9	8	8	12
4	1	4	4	16	16	16	16	64	16	64	64	64
5	1	4	4	16	20	16	16	64	16	80	80	64
